Features

Ceramic logs

Unique ceramic logs featuring a high level of detail and innovative construction, the in-log Fecralloy fibers ensure perfect air / gas mixture and flame distribution for safe combustion.

Interior lining

The rear and side walls of the combustion chamber can be lined in anthracite (matte) or ceramic black glass (gloss). The inner lining of ceramic glass reflects the flames and gives the combustion chamber more depth.

LED ambient lighting

The LED ambient lighting simulates a bed of glowing coals. The glowing coal bed can be utilized as a soft light source when the appliance is switched off.

Fire on demand

Simply switch on the device and choose between a uniform flame display, or ECO mode.

Data sheet

In our data sheet you will find the technical data and dimensions. Scan now!

Design, Function & Safety

Reignite the fire! With a gas fireplace you bring warmth, atmosphere and on-demand coziness into your home. Experience Camina & Schmid combustion technology and enjoy comfort, style and innovation.

Trust and safety

Safety in everything. Minimal energy for start-up, protective cross lighting, double glass barrier with heat-resistant / reflective inner pane, and safety glass outer pane. Double flame guard and oversized pressure relief valves are only a few of the many Camina & Schmid gas fire safety specifications.

Second burner function

The second burner function gives you more control over your fire. The control range in heat output and energy absorption is nearly doubled. Coupled with the ECO mode, the second burner allows you to perfectly match the fire output and visual dynamics to your needs.

Fire on demand

The intelligent remote control is made for easy handling and simple operation of all Camina & Schmid gas fireplaces. Simply switch on the device and choose between a

uniform flame display, or ECO mode – where the flame display varies dynamically, resulting in a beautiful, realistic flame that saves energy and produces less heat.

Full control

The colorful WiFi-App gives you full control over your fireplace. In addition to direct manual programming, you can choose from a thermostatic program and a fully programmable ECO mode for an individualized, dynamic yet efficient flame display. To protect from curious little hands, the app even features a child lock option. Safety is of paramount importance in everything that Camina & Schmid does.

Technical Data

Nominal heat load	47000 BTU / h
Operating range	12000 – 36000 BTU / h
